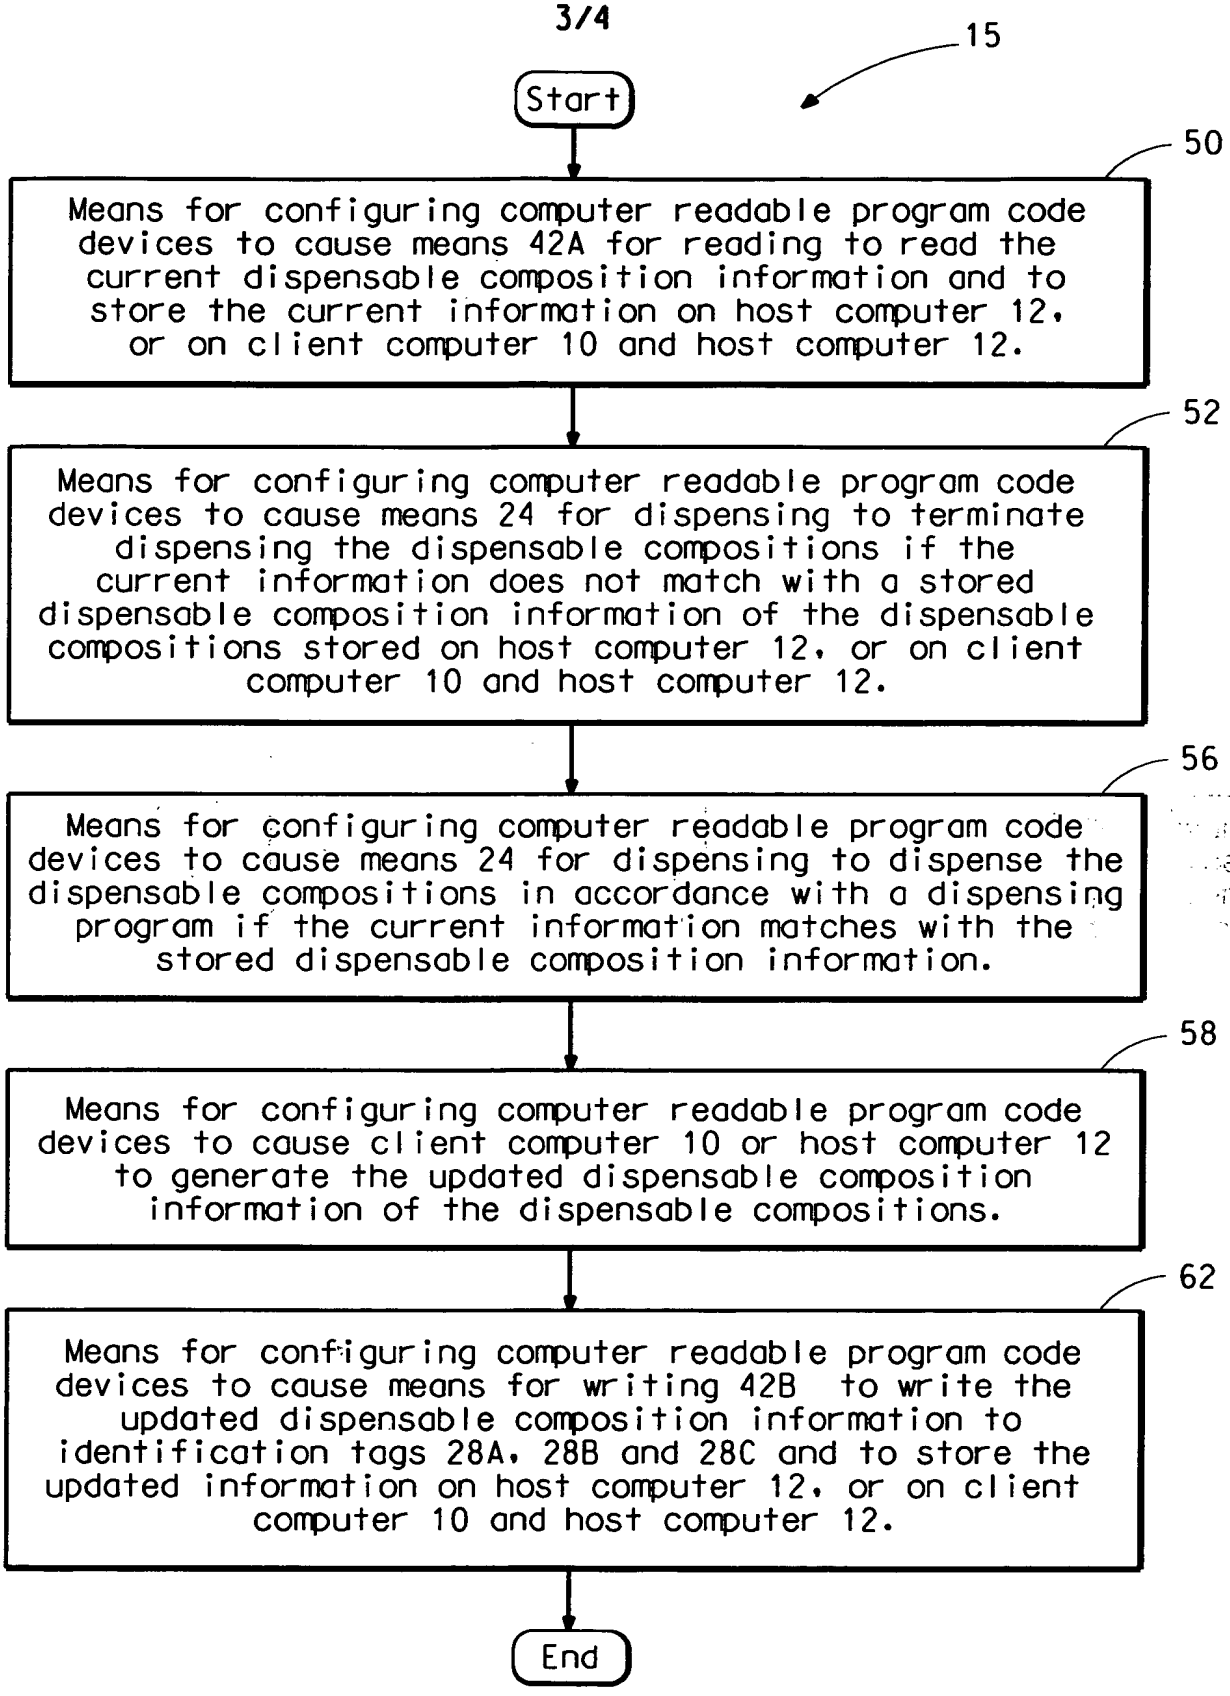
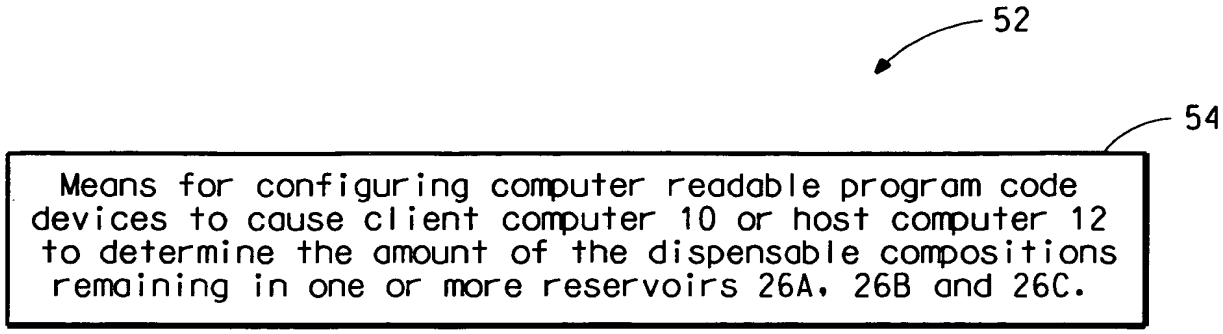
FIG. 2



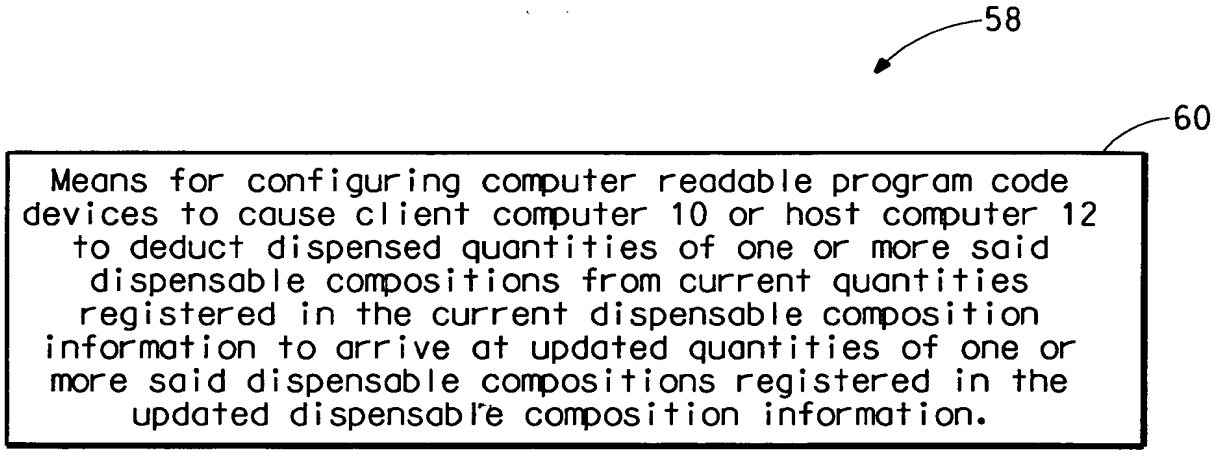
15
Start
50
Means for configuring computer readable program code devices to cause means 42A for reading to read the current dispensable composition information and to store the current information on host computer 12, or on client computer 10 and host computer 12.
52
Means for configuring computer readable program code devices to cause means 24 for dispensing to terminate dispensing the dispensable compositions if the current information does not match with a stored dispensable composition information of the dispensable compositions stored on host computer 12, or on client computer 10 and host computer 12.
56
Means for configuring computer readable program code devices to cause means 24 for dispensing to dispense the dispensable compositions in accordance with a dispensing program if the current information matches with the stored dispensable composition information.
58
Means for configuring computer readable program code devices to cause client computer 10 or host computer 12 to generate the updated dispensable composition information of the dispensable compositions.
62
Means for configuring computer readable program code devices to cause means for writing 42B to write the updated dispensable composition information to identification tags 28A, 28B and 28C and to store the updated information on host computer 12, or on client computer 10 and host computer 12.
End

FIG. 3



52
54
Means for configuring computer readable program code devices to cause client computer 10 or host computer 12 to determine the amount of the dispensable compositions remaining in one or more reservoirs 26A, 26B and 26C.

FIG. 4



58
60
Means for configuring computer readable program code devices to cause client computer 10 or host computer 12 to deduct dispensed quantities of one or more said dispensable compositions from current quantities registered in the current dispensable composition information to arrive at updated quantities of one or more said dispensable compositions registered in the updated dispensable composition information.

FIG. 5
